Profile

Software Engineer specializing in front end development. Valuable Team Player with Personable and Dedicated Nature. Love Learning New Things and Tools Every Day. If I don't know something, I will learn it.

Technical Skills

- Web & App Technology – React, Redux, JavaScript, HTML, CSS, Basics of React-Native, JSON, Bootstrap.
- Programming Language: Basics of OOPs: Java.
- Java – Core Java, Collections, Spring Boot.
- Basics of Data Structures and Algorithms.
- Tools & Editor – Git, Visual Studio, Eclipse, Edit-Plus, Notepad++, Sts, Heroku.

Experience

GlobalLogic   Noida-India   December 2018-Present

Software Engineer

Project:

Health-Care: - It is a health care project in which this software works like ensuring the right staff is in the right place, at the right time to meet real patient needs. Greater involvement of staff in the rostering process, visibility of schedules, and fairness of allocations.
Language: - React, Redux, JavaScript, HTML, CSS, Typescript.

Operation System: - Window.

Responsibilities:

- Evaluated project requirements and specifications and developed software applications that surpassed client expectations.
- Follow an agile mindset.
- Design and developed the assigned modules.
- Always tried to complete our assigned task on time.

Projects

Self-Motivated Project:

- **Click-Media: -** React, Redux-application

  - This project is basically a social media type project. In this project, the first page is a landing page it shows profile pic and name of everybody who are using this platform. When we click on any of them then it opens a profile page in which all information including address on the map. It will show in other page whose name is profile page. On this page, the chat section is also there who shows how many people are active and how many people are not active. You can open chat box on click on any of it. After that post section and gallery section is also there.

  - **Language**: React, Redux, JavaScript, Bootstrap, HTML, CSS, Material-UI.

  - **Live on:** https://vivekch05.github.io/click-media/#/

- **E-Book Reader: -** React, Redux-application

  - This project is basically for reading books online. In this project, the user can experience seeing the all book list. Each book has the option to add to cart. When the user adds it into the cart then users are able to view and read this book. Users can delete a book from the cart also. Create a book option is also there through this we can create a book according to requirement. I created JSON Server for this project through this I am displaying all data in the All Book Section.

  - **Language**: React, Redux, JavaScript, JSON, Bootstrap, HTML, CSS.

  - **Live on:** https://vivekch05.github.io/e-book-reader/#/

- **Contact-List:-** React, Redux-application

  - This project basically for the contact list. In this project, it will show the contact list. On the top of this contact list, one button is there, when you click on it then it will open a form in which you put the information and mobile no and you can save it. When you save it, then it will show in the contact list. When you click on any of this contact list, then it will show all details about that in the side panel in which two-button will be there one for edit and one for delete. These all crud operation is handled through my own created JSON server.

  - **Language**: React, Redux, JavaScript, JSON, Bootstrap, HTML, CSS.

  - **Git-Link:** https://github.com/Vivekch05/contact-list

- **Portfolio Application: -** React-application

  - This is a portfolio project. In this portfolio, there are four sections. About Section, Resume Section, Project Section and Contact Section. Each Section contains different things.

  - **Language**: React, JavaScript, HTML, CSS

  - **Live on:** http://www.vivekch.com/

- **Movie-series-info: -** React, Redux -application

  - This project works for movies, series info. When we search for any movie and series then it gives the information about all movies and series related to search and I integrated it with external movies data API "OMDBI".

  - **Language**: React, Redux, JavaScript, Bootstrap, HTML, CSS.

  - **Live on:** https://vivekch05.github.io/movie-series-info/#/

- **Tetris Game: -** React hooks-application

  - ➢ This is a gaming project. In this project you can play this game using keypad using all four arrow keys, you can rotate the player using the upper arrow key. In the side panel, your score and level will be visible. When you complete your rows then it will be counted and it will be visible also in a side panel.

  - ➢ **Language**: React, Hooks, Styled -Components and some Gaming Concepts.

  - ➢ **Live on-** https://vivekch05.github.io/Tetris-Game/

- **Book Store** –React, Redux-application

  - ➢ Book store application is a simple e-commerce type application. Where users can experience add an item to the cart, remove the item from cart, checkout, place order this type of functionality. Admin can modify the book which is available and which is not available. All the data comes from my own created JSON Server.

  - ➢ **Language**: React, Redux, JavaScript, HTML, CSS.

  - ➢ **Live on:** https://vivekch05.github.io/Book-Store/

- **News-App: -** React-Native-Application

  - ➢ This is a news app. In this app, there are three sections. General, Business, and Technology each section contain section related news. In general section all type of news will shows. I had used newsapi.org API key for this application.

  - ➢ **Language**: React-native

  - ➢ **Git-link-** https://github.com/Vivekch05/News-App

Educations

B Tech-(ECE)	JECRC-Jaipur	71.06%	2014-2018
Standard 12th	R.K.D College-Patna	71.4%	2014
Standard 10th	R.S.H School-Bagaha	73.2%	2011

Certifications

- **Java**   Abc Technology   Bangalore   July 2018 to December 2018.
- **Data Structure and Algorithm**   Udemy   April 20, 2020

Achievements

- Promoted to software engineer on basis of performance in globallogic in Jan 2020.
- Runner up in a game of drones competition in inter-college contest renaissance 2018.
- Winner in drone racing competition in inter-college contest renaissance 2017.
